

JITHENDRAN SUBBURAJ

Data Security | DLP & EDRF Product Contributor | Engineering Collaboration | 12 Years | Bengaluru, India

+91 9940201968 | jithendran93@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Trellix insider with 12 years in data security, including deep hands-on experience with the Trellix DLP product family (Endpoint, Network/Prevent, Discover, Monitor) and the full Data Encryption portfolio (Drive Encryption, FRP, MNE). For the past 4+ years, the core of my work has been PM-adjacent: filing architectural design proposals that influenced release roadmaps, conducting competitive intelligence against industry peers, proposing 20+ product enhancements that were integrated into the product roadmap, coordinating cross-functional alignment across Sales, PS, Marketing, and Engineering, and managing enterprise customer escalation feedback loops. Experienced with Agile PI Planning, Jira backlog management, sprint execution, and release validation. Proven track record of translating customer operational challenges into product feedback, DCRs, and feature proposals. Actively leverage AI-assisted tooling to build productivity automation and diagnostic tools.

CORE COMPETENCIES

Product Execution & Delivery:

Feature Proposal & Roadmap Contribution (20+ enhancements adopted), User Story Authoring & Acceptance Criteria Definition, Agile PI Planning & Sprint Execution, Jira Backlog Management (Test & Product Defect Tracking), Release Validation, Acceptance Testing & GA Sign-off, Design Change Requests (DCRs) to engineering and vendor PGs

Data Encryption Portfolio:

Drive Encryption (McAfee/Trellix DE) -- enterprise deployment & Sev1/2 support, File & Removable Media Protection (FRP) -- file-level encryption governance, McAfee Native Encryption (MNE) -- native management & coexistence, Full Disk Encryption policy management, recovery & audit, WinPE-based encryption recovery tooling (custom-built, Windows ADK), Encryption coexistence with DLP Endpoint -- tested across product releases

Data Loss Prevention Domain:

Trellix DLP Endpoint, Network (Prevent), Discover & Monitor, Data Classification Engine, Policy Enforcement & Incident Management, Web Protection & Cloud Application DLP (Skyhigh CASB), OCR-based DLP detection (PoC showcased at Trellix Innovation Showcase 2023), Microsoft Purview DLP -- Endpoint, Exchange, SharePoint, Teams, OneDrive, Chrome Content Analysis Connector SDK (Google Engineering collaboration)

Customer, Market & Cross-Functional:

Customer Escalation Management -- Sev1/2 global enterprise accounts, Competitive Intelligence -- deep analyses against industry peers, Field & Sales Enablement -- arming teams with competitive positioning, Cross-Functional Alignment -- Engineering, Sales, PS, Marketing, Customer Success, Enterprise Customer Demos & Beta Program Support, Technical Training Delivery -- global support teams & enterprise customers

WORK EXPERIENCE

Staff QA Technical Lead -- Trellix EDR with Forensics (EDRF)

Jun 2024 - Present

Trellix

Bengaluru, India

- Act as Technical Lead and de facto product quality liaison for Trellix EDR with Forensics (TEDRF) -- owning end-to-end test strategy, sprint execution, and GA release sign-offs while filing architectural design proposals and enhancement requests that directly influence engineering roadmaps.
- Translate complex customer-reported escalations into structured product requirements, triage decisions, and resolution plans -- bridging Customer Support, Engineering, and Product Management across multiple Trellix product lines.
- Deliver high-impact product demonstrations to global enterprise stakeholders and train cross-functional teams (Sales, PS, Customer Support) on new product capabilities at each release cadence.
- Leverage AI-assisted development tooling to build diagnostic automation and internal productivity tools that reduce manual analysis overhead for engineering and support teams.
- Recognised with the Trellix Quarterly Extreme Ownership Award (Q2 2025) for delivery excellence and cross-functional leadership with the EDRF team.

Senior Technical Manager -- Microsoft Purview DLP

Nov 2023 - Jun 2024

Vodafone Intelligent Solutions (VOIS)

Bengaluru, India

- Raised Design Change Requests (DCRs) directly to the Microsoft Purview Product Group for DLP Endpoint suite enhancements, translating enterprise deployment friction into prioritised product feedback at the vendor level.
- Partnered with Project Delivery Managers to align enterprise security objectives with DLP product roadmaps, contributing to delivery epics and milestone definition through Agile PI Planning sessions.
- Authored deployment and governance documentation for DLP policies across M365 workloads (Endpoint, Exchange, SharePoint, Teams, OneDrive); translated complex GDPR and EU AI Act compliance requirements into actionable DLP policy configurations.

Product Software QA Engineer -- Data Loss Prevention

Mar 2021 - Nov 2023

Trellix

Bengaluru, India

- Proposed 20+ product feature enhancements across Trellix DLP Endpoint, Discover, and Prevent following deep competitive intelligence analyses; multiple proposals were integrated directly into the Trellix product roadmap.
- Armed Sales, Marketing, and Professional Services teams with competitive technical intelligence to differentiate Trellix DLP and Encryption solutions against market peers including Microsoft Purview, Forcepoint, and Symantec.
- Collaborated directly with Google Engineering to validate and certify the Chrome Content Analysis Connector SDK integration with Trellix DLP Endpoint, coordinating test coverage requirements across both engineering teams.
- Managed the Jira test backlog for DLP product releases -- authored 100+ test cases and resolved/reported 90+ product defects in one fiscal year across DLP Endpoint and CASB product lines.
- Developed an OCR in DLP Endpoint Proof-of-Concept that was showcased at the Trellix India Innovation Showcase 2023, demonstrating content inspection in images and screenshots for endpoint DLP policy enforcement.
- Led Triage meetings with Product Support and delivered product and troubleshooting training to enterprise customers and global internal teams.

Senior Technical Support Engineer -- Data Protection (DLP | FRP | Drive Encryption)

Mar 2020 - Mar 2021

McAfee Enterprise / Trellix

Bengaluru, India

- Resolved Severity 1 & 2 global customer crises for DLP Endpoint, Drive Encryption, File & Removable Media Protection (FRP), and McAfee Native Encryption (MNE) -- building authoritative product expertise across the full Data Protection portfolio.
- Served as the escalation authority for enterprise accounts in EMEA and APAC, capturing customer-reported friction and feature gaps and channeling them back to Product and Engineering as structured improvement inputs.
- Authored global KB articles and instructional videos adopted by support tiers globally; named Top 5 Finalist at McAfee India Awards -- Fearless Innovator category.

Technical Support Engineer -- Data Protection

Feb 2018 - Mar 2020

McAfee Software India

Bengaluru, India

- Delivered global tier-3 enterprise support across McAfee DLP Endpoint, Drive Encryption, and data protection suites -- resolving complex policy enforcement, classification accuracy, and upgrade failure scenarios for enterprise accounts.
- Engineered a custom Drive Encryption recovery tool using Windows ADK/WinPE, reducing recovery resolution time for corrupted-system cases; created KB articles and MER Analyzer rules adopted by the global support organisation.

Senior Analyst -- Endpoint Security & Compliance (McAfee | Symantec)

Aug 2014 - Jan 2018

HCL Technologies

Chennai, India

- Managed McAfee ePO, DLP, and Symantec Endpoint Protection Manager (SEPM 14) infrastructures for global enterprise accounts.
- Authored and deployed a custom automation script via PSEXEC across 100,000+ endpoints to purge legacy AV systems, delivering \$86,600 USD in license and overhead cost savings for the client.

TECHNICAL SKILLS

Product Execution:

Feature Proposals & DCRs, User Stories & Acceptance Criteria, Backlog Management (Jira), PI Planning (SAFe / Agile), Sprint Execution & Release Validation, Go-to-Market Alignment

Data Loss Prevention:

Trellix DLP Endpoint / Prevent / Discover / Monitor, McAfee DLP & CASB (Skyhigh), Microsoft Purview DLP, Data Classification & Policy Enforcement, OCR-based DLP Detection, Incident Management & Web Protection

Data Encryption:

Drive Encryption (McAfee/Trellix DE), File & Removable Media Protection (FRP), McAfee Native Encryption (MNE), Full Disk & File/Folder Encryption, WinPE Encryption Recovery, Encryption-DLP Coexistence

Customer Engagement:	Customer Escalation Management (Sev1/2), Competitive Intelligence, Field & Sales Enablement, Enterprise Demo Delivery, Beta Program Support, Cross-Functional Leadership
Engineering Tools:	Python (automation, diagnostics, reporting), PowerShell (policy scripting), AI-Assisted Development, Chrome Content Analysis SDK, API Integration, Jira / Confluence / ServiceNow
Security Platforms:	Trellix EDR / XDR / ENS, McAfee ePO, Skyhigh Security CASB, Microsoft Purview, Microsoft Defender, Symantec SEP

CERTIFICATIONS

Exam Prep SC-200: Microsoft Security Operations Analyst <i>Whizlabs / Coursera ID: Grade: 93.14% coursera.org/verify/V7T1W61R0XCU</i>	Jul 2026
Operationalizing MITRE ATT&CK for SOCs <i>Picus Security -- Purple Academy ID: Badge: 6a4a3145ad8591b9950aee26 1 CPE</i>	Jul 2026
Singapore PDPA -- Foundations e-Learning Certificate <i>Personal Data Protection Commission (PDPC), Singapore ID: Score 27/30</i>	Jul 2026

DLP COMPETITIVE INTELLIGENCE & TECHNICAL ARTICLES

Microsoft Just Closed the DLP Gap That Trellix Never Had

Competitive analysis of Trellix vs Microsoft Purview Endpoint DLP architecture -- contrasting Trellix's action-aware OS-level egress hooks against Purview's path-based exclusion model, identifying why AppData/Temp blind spots existed in Purview and what evaluators should ask before deployment.

The ZIP File That Walked Past Your DLP

Analysis of label-dependent DLP fragility when users compress or strip metadata from sensitive files -- arguing for layered content-based inspection over label-only enforcement, with a comparison of Trellix and Purview archive inspection capabilities.

The Transfer Method Microsoft Purview Still Cannot See

Identifies macOS AirDrop (AWDL) as an unmonitored exfiltration vector in Microsoft Purview Endpoint DLP, with no coverage in the supported macOS activities table -- contrasting with Trellix DLP's application-level interception of AirDrop transfers.

Threat Hunt: Catching CVE-2026-33829 (Windows Snipping Tool NTLM Leak) in Trellix EDRF

Practical threat hunt guide for detecting CVE-2026-33829 credential theft via Windows Snipping Tool using Trellix EDR historical and real-time search queries -- covering process execution patterns, Port 445 lateral movement indicators, and detection rule automation.

AI-ASSISTED TOOLS & AUTOMATION PROJECTS

EDRF Client Diagnostics Analyzer

Streamlines analysis of diagnostic packages exported from the Trellix HX portal, eliminating hours of manual log-file review for Trellix support and engineering teams. Developed leveraging AI-assisted tooling (GoLang).

DLP Log Analyzer

Python-based log diagnostic utility that parses Trellix DLP incident logs, aggregates policy-hit rates by classification rule, and surfaces false-positive trends -- directly applicable to DLP policy tuning and product quality workflows.

Application Crash Reporter

Enterprise-grade crash detection, notification, and centralized reporting system for Windows, Linux, and macOS with real-time monitoring and secure centralized uploads. Developed leveraging AI-assisted tooling.

Supportability Portal -- Engineering KB Hub

Internal knowledge hub centralising critical engineering resources, DLP policy runbooks, escalation guides, and product documentation for global technical teams -- reducing time-to-resolution for cross-functional product queries.

CyberScroll Syslog Server

Open-source syslog infrastructure with integrated parsers for Trellix systems and dedicated dashboards for EDRF EventStreamer and Trellix EPO log analysis. Developed leveraging AI-assisted tooling (GoLang).

Trellix Root Certificate Checker

Checks Windows endpoints for the presence of 26 critical certificates (13 root + 13 intermediate), reporting results directly back to Trellix ePO via custom properties for fast bulk remediation.

Linux TA Status Monitor

GUI tool to streamline, manage, and monitor Trellix Agent and EDRF operations on Linux servers -- providing real-time agent health visibility for large-scale Linux endpoint deployments. Developed leveraging AI-assisted tooling.

HX IOC Rule Creator

GUI-based tool to simplify the creation of custom IOC rules in FireEye/Trellix HX without manually executing complex command-line curl sequences -- reducing rule-authoring time for threat hunt campaigns.

WinPE Creator Tool

Specialised recovery utility for Drive Encryption built atop Windows ADK/WinPE to recover corrupted systems where standard remediation paths were unavailable.

EDUCATION

Bachelor of Engineering -- Computer Science Engineering	2014
Anna University - India
