

JITHENDRAN SUBBURAJ

Cybersecurity Technical Lead & Product Contributor | Bengaluru, India | Open to Remote/Hybrid

+91 9940201968 | jithendran93@gmail.com | LinkedIn | YouTube Channel | GitHub | Portfolio

PROFESSIONAL SUMMARY

Cybersecurity professional with 12 years of experience in technical quality assurance, security delivery, product contribution and technical support across enterprise-scale environments. Proven track record at Trellix (formerly McAfee) and in Microsoft Purview DLP engagements in driving product quality, competitive intelligence, customer enablement, and cross-functional collaboration. Deep expertise in DLP, EDR/XDR, endpoint security, and cloud security products. Actively transitioning into Technical Product Management and Security Delivery leadership roles, bringing hands-on product feedback, roadmap contribution, and competitive strategy experience. Open to remote opportunities in the UK, Europe, and Singapore/APAC.

CORE COMPETENCIES

Cybersecurity Domains:

DLP (Endpoint & Network), EDR / XDR, Microsoft Purview, CASB, Endpoint Security, Data Exfiltration Prevention, Drive Encryption

Professional Services & Consulting:

Solutions Architecture, Proof-of-Concept Prototyping, Technical Training, Product Demos, Custom Client Integrations

Product Strategy & TPM:

Product Roadmap Contribution, PI Planning, Design Change Requests (DCRs), Feature Proposal & Prioritisation, Competitive Intelligence

Technical Support & Tooling:

Python & Scripting Automation, API Integration, Custom Tool Development, Customer Support/Escalation Management, Agile / Scrum

WORK EXPERIENCE

Staff Software QA – Technical Lead

Jun 2024 - Present

Trellix India

Bengaluru, India

- Serve as Technical Lead for Trellix EDR with Forensics and Xclient (TEDRF), owning end-to-end test strategy, plan execution, and GA release sign-offs.
- Act as the 'voice of product quality' to engineering, filing architectural design proposals and enhancement requests that directly influence product roadmaps.
- Manage customer-reported escalations, perform exploratory testing across product lines, and deliver high-impact product demos to global stakeholders.
- Train cross-functional teams on new features and champion test automation tooling.

Senior Technical Manager – Microsoft Purview DLP

Nov 2023 - Jun 2024

Vodafone Intelligent Solutions (Microsoft DLP Engineering Engagement)

Bengaluru, India

- Led testing, deployment, and ongoing management of Microsoft Purview DLP across Vodafone's enterprise environment, protecting sensitive market data from exfiltration across endpoints and cloud services
- Identified and reported issues with the Microsoft Purview suite directly to the Microsoft Product Group; raised Design Change Requests (DCRs) to drive enhancements to the DLP Endpoint suite
- Partnered with Project Delivery Managers to align enterprise security objectives with DLP Endpoint roadmaps through Agile PI Planning sessions.

Product Software Quality Engineer – Data Loss Prevention

Mar 2021 - Nov 2023

Trellix India

Bengaluru, India

- Armed Sales, Marketing, and Professional Services teams with the technical intelligence required to position and implement DLP solutions for enterprise clients.
- Conducted deep-dive competitive analyses against industry peers; proposed 20+ feature enhancements, many of which were integrated directly into the core product roadmap.
- Developed custom system-level script automations that drastically slashed troubleshooting resolution times; developed an OCR in DLP Endpoint POC showcased at Trellix India Innovation Showcase 2023.

- Authored 100+ test cases in Jira and successfully resolved/reported 90+ product bugs in one year.
- Collaborated closely with Google Engineering to validate Chrome Content Analysis Connector SDK integration with Trellix DLP.
- Led Triage meetings with Product Support Teams; delivered product and troubleshooting training to Customer Support teams and enterprise customers

Senior Technical Support Engineer – Data Protection

Mar 2020 - Mar 2021

McAfee Enterprise / Trellix

Bengaluru, India

- Resolved business-critical Severity 1 & 2 customer crises globally for DLP, Drive Encryption, FRP, and MNE products.
- Authored global KB articles and instructional videos, successfully upskilling standard support tiers and enterprise clients globally.
- Named Top 5 finalist at the McAfee India Awards – Fearless Innovator category

Technical Support Engineer – Data Protection

Feb 2018 - Mar 2020

McAfee Software India

Bengaluru, India

- Delivered global tier-3 enterprise support for McAfee portfolio suites; diagnosed root causes for complex network and software upgrade failures.
- Engineered a customized drive encryption recovery tool using Windows ADK/PE.
- Created KB articles, MER Analyzer rules, and instructional videos

Senior Analyst – Endpoint Security & Compliance

Aug 2014 - Jan 2018

HCL Technologies

Chennai, India

- Managed McAfee EPO, DLP, and Symantec Endpoint Protection Manager (SEPM 14) infrastructures for global enterprise accounts.
- Authored and deployed a custom automation batch script via PSEXEC across 100,000+ endpoints to purge legacy antivirus systems, saving the client \$86,600 USD in license and overhead costs.
- Trained new L1 engineers on McAfee Endpoint products; handled DAT remediation and AV software recovery

EDUCATION

B.E. Computer Science Engineering

2014

Tagore Engineering College - India

TECHNICAL SKILLS

Languages:	Python, Batch Scripting, PowerShell, Windows ADK / WinPE
Frameworks & Libraries:	Data Loss Prevention (Endpoint & Network), EDR / XDR, Microsoft Purview DLP, CASB, Data Exfiltration Prevention, Drive Encryption
Cloud & DevOps:	Microsoft Purview, Trellix DLP / EDR / ENS / MNE / FRP, Trellix Drive Encryption, McAfee EPO, Skyhigh CASB, Helix XDR, Microsoft Defender, Symantec SEP
Tools & Technologies:	Jira, Agile / Scrum, PI Planning, Chrome Content Analysis Connector SDK, MER Analyzer, API Integration
Regulatory Frameworks:	Singapore Personal Data Protection Act (PDPA)

CERTIFICATIONS

Exam Prep SC-200: Microsoft Security Operations Analyst

Jul 2026

Whizlabs / Coursera | ID: Grade: 93.14% | coursera.org/verify/V7T1W61R0XCU

Operationalizing MITRE ATT&CK for SOCs

Jul 2026

Picus Security – Purple Academy | ID: Badge: 6a4a3145ad8591b9950aee26 | 1 CPE

Singapore PDPA – Foundations e-Learning Certificate

Jul 2026

Personal Data Protection Commission (PDPC), Singapore | ID: Score 27/30

NOTABLE PROJECTS

EDRF Client Diagnostics Analyzer

Streamlines analysis of diagnostic packages exported from the Trellix HX portal, eliminating hours of manual log-file review for Trellix support and engineering teams. Developed leveraging AI-assisted tooling.

CyberScroll Syslog Server

Open-source syslog infrastructure with integrated parsers for Trellix systems and dedicated dashboards for EDRF EventStreamer and Trellix EPO log analysis. Developed leveraging AI-assisted tooling.

Application Crash Reporter

Comprehensive enterprise-grade crash detection, notification, and centralized reporting system for Windows, Linux, and macOS featuring real-time monitoring and secure centralized uploads. Developed leveraging AI-assisted tooling.

Trellix Root Certificate Checker

Checks Windows endpoints for the presence of 26 critical certificates (13 root + 13 intermediate), reporting results directly back to Trellix ePO via custom properties for fast bulk remediation. Developed leveraging AI-assisted tooling.

Linux TA Status Monitor

A graphical user interface (GUI) tool developed to streamline, manage, and monitor Trellix Agent and EDRF (Endpoint Detection and Response Framework) operations on Linux servers. Developed leveraging AI-assisted tooling.

HX IOC Rule Creator

A GUI-based tool developed to simplify the creation of custom IOC rules in FireEye/Trellix HX without manually executing complex command-line curl sequences. Developed leveraging AI-assisted tooling.

DLP Log Analyzer

A Python-based log diagnostic utility that significantly minimized enterprise downtime during performance bottlenecks.

WinPE Creator Tool

A specialized recovery utility for drive encryption built atop Windows ADK to save corrupted systems.

Supportability Portal

Designed and launched an internal knowledge hub that centralized critical engineering resources for global technical groups.
