

JITHENDRAN SUBBURAJ

Cybersecurity Technical Lead & Product Contributor | Bengaluru, India | Open to Remote/Hybrid

+91 9940201968 | jithendran93@gmail.com | [LinkedIn](#) | [YouTube Channel](#)

PROFESSIONAL SUMMARY

Cybersecurity professional with 12 years of experience in technical quality assurance, security delivery, and product contribution across enterprise-scale environments. Proven track record at Trellix (formerly McAfee) and in Microsoft Purview DLP engagements in driving product quality, competitive intelligence, customer enablement, and cross-functional collaboration. Deep expertise in DLP, EDR/XDR, endpoint security, and cloud security products. Actively transitioning into Technical Product Management and Security Delivery leadership roles, bringing hands-on product feedback, roadmap contribution, and competitive strategy experience gained throughout career. Open to remote opportunities in the UK, Europe, and Singapore/APAC.

CORE COMPETENCIES

Cybersecurity Domains: DLP (Endpoint & Network) | EDR / XDR | Microsoft Purview | CASB | Endpoint Security | Data Exfiltration Prevention | Drive Encryption

Product Contribution & Strategy: Product roadmap contribution | PI Planning | Design Change Requests (DCRs) | Feature proposal & prioritisation | Competitive intelligence | Battle card development

Delivery & Collaboration: Security delivery management | Cross-functional stakeholder engagement | Customer escalation management | Agile / Scrum | Jira

Enablement & Tooling: Product demos & whitepapers | Technical training | Python & batch scripting automation | API integration | Custom tool development

Platforms: Microsoft Purview | Trellix DLP / EDR / ENS / MNE / FRP | Trellix Drive Encryption | McAfee EPO | Skyhigh CASB | Helix XDR | Microsoft Defender | Symantec SEP

PROFESSIONAL EXPERIENCE

Staff Software QA – Technical Lead

June 2024 – Present

Trellix India, Bengaluru

- **Product Test Leadership:** Served as Technical Lead for Trellix EDR with Forensics and Xclient (TEDRF), owning end-to-end test strategy for Beta and GA releases including test plan preparation, execution, and sign-off.
- **Product Feedback & Enhancement:** Filed product enhancement requests and architectural design improvement proposals, directly influencing product design decisions — functioning as a product-quality voice to engineering teams.
- **Cross-functional Delivery:** Delivered product demos to stakeholders and customers, triaged customer-reported issues, performed end-to-end and exploratory testing across product lines.
- **Enablement:** Trained teams on new product features, developed test cases, and contributed actively to product documentation and tools automation.

Senior Technical Manager – Microsoft Purview DLP

Nov 2023 – June 2024

Vodafone India, Bengaluru (Microsoft DLP Engineering Engagement)

- **DLP Deployment & Policy Management:** Led testing, deployment, and ongoing management of Microsoft Purview DLP across Vodafone's enterprise environment, protecting sensitive market data from exfiltration across endpoints and cloud services.
- **Product Improvement:** Identified and reported issues with the Microsoft Purview suite directly to the Microsoft Product Group; raised Design Change Requests (DCRs) to drive enhancements to the DLP Endpoint suite.

- **Roadmap Contribution & PI Planning:** Collaborated with Project Delivery Managers to contribute to DLP Endpoint roadmaps and facilitated PI Planning sessions to align security delivery with business objectives.

Product Software Quality Engineer – Data Loss Prevention

Mar 2021 – Nov 2023

Trellix India, Bengaluru

- **Subject Matter Expert & Customer Engagement:** Acted as SME for DLP Endpoint and Network products, supporting Professional Services, Sales, and Marketing teams in implementing and positioning DLP solutions for enterprise customers.
- **Competitive Intelligence & Feature Proposals:** Conducted competitive analysis of DLP products and proposed 20+ product enhancements to the Product Management team, several of which were incorporated into the roadmap to improve supportability and performance.
- **Custom Tooling & Automation:** Developed the DLP Log Analyzer Tool using Python and batch scripting, significantly reducing performance issue resolution time and improving customer experience.
- **Product Testing & Bug Reporting:** Executed manual testing across Windows and Mac on-premises and SaaS environments; reported 90+ product bugs in one year and designed 100+ test cases in Jira for new features and regression cycles.
- **Third-party Integration & Innovation:** Collaborated with Google Engineering to validate the Chrome Content Analysis Connector SDK integration with Trellix DLP. Developed an OCR in DLP Endpoint POC showcased at Trellix India Innovation Showcase 2023.
- **Customer Escalation & Training:** Led Triage meetings with Product Support Teams; delivered product and troubleshooting training to Customer Support teams and enterprise customers.

Senior Advance Field Enablement Engineer – Data Protection

Mar 2020 – Mar 2021

McAfee Enterprise / Trellix, Bengaluru

- **Escalation Management:** Handled Severity 1 and 2 customer escalations for DLP, Drive Encryption, FRP, and MNE products; identified and flagged emerging product issues to Engineering teams.
- **Training & Knowledge Management:** Conducted new hire and technical training sessions; created KB articles and troubleshooting videos to upskill support teams and assist customers globally.
- **Recognition:** Named Top 5 finalist at the McAfee India Awards – Fearless Innovator category.

Technical Support Engineer – Data Protection

Feb 2018 – Mar 2020

McAfee Software India, Bengaluru

- Provided global enterprise technical support for McAfee DLP, EPO, Drive Encryption, FRP, and Endpoint Security products via call and service portal.
- Resolved complex software and network issues; specialised in upgrade failure diagnosis and root cause analysis.
- Created KB articles, MER Analyzer rules, and instructional videos; developed a drive encryption recovery tool using Windows ADK and Windows PE.

Senior Analyst – Endpoint Security & Compliance

Aug 2014 – Jan 2018

HCL Technologies, Chennai

- Managed McAfee EPO infrastructure, DLP, and Symantec Endpoint Protection Manager (SEPM 14) deployments for large enterprise clients.
- Authored a batch script deployed via PSEXEC across 1 lakh+ machines to remove legacy antivirus versions, saving the client USD \$86,600.
- Trained new L1 engineers on McAfee Endpoint products; handled DAT remediation and AV software recovery.

TOOLS DEVELOPED

- **DLP Log Analyzer** – Python-based log analysis tool that reduced DLP performance issue resolution time significantly across enterprise deployments.
- **WinPE Creator Tool** – Windows PE-based drive encryption recovery utility built using Windows ADK.
- **Supportability Website** – Internal knowledge portal centralising troubleshooting resources for support teams.

EDUCATION

B.E. Computer Science Engineering | Tagore Engineering College, India | 2014 |
